Problem Statement : Design an AI-driven solution that helps create, manage, personalize, or distribute digital content more effectively.

ARTIVIST

Artists finding each other by EMOTIONS, not ALGORITHMS.

We are building a creative, open-source art ecosystem where people connect through skill, style, and intent rather than popularity. A filmmaker can discover a music producer whose sound emotionally aligns with his script. A visual artist can collaborate with a writer whose strokes complement their aesthetic. Here, **AI** plays the role of your personal marketing agent, content assistant and distributor, analysing and advising you every step

THE DIFFERENCE

No FYP, no freelance. It is an AI-driven creative ecosystem that unifies collaboration, analytics, and distribution in one system.

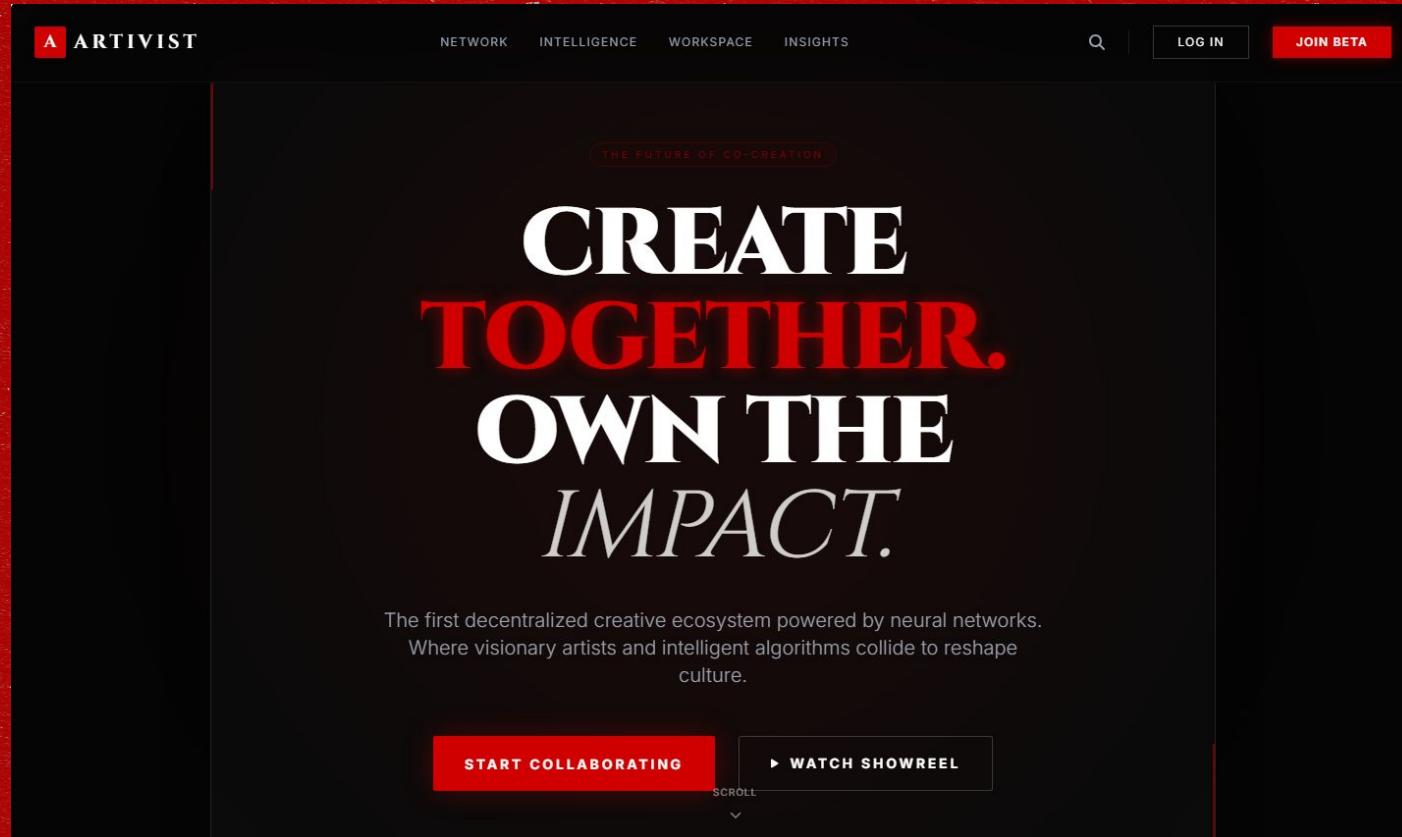

THE SOLUTION

It connects creators by skill, skill by intent, and provides structured collaboration and uses predictive AI to guide performance before publishing.

THE USP

Too serious for Instagram, too informal for LinkedIn. Providing a real expressive space for art and artists.

The screenshot shows the homepage of ARTIVIST, a platform for decentralized creative ecosystems. At the top, there's a navigation bar with links for NETWORK, INTELLIGENCE, WORKSPACE, and INSIGHTS. On the right side of the bar are a search icon, a LOG IN button, and a JOIN BETA button. The main title "ARTIVIST" is displayed in a large, bold, white font. Below it, a subtitle reads "THE FUTURE OF CO-CREATION". The central focus is a large, stylized text block that says "CREATE TOGETHER. OWN THE IMPACT." in white and red. Below this, a descriptive paragraph reads: "The first decentralized creative ecosystem powered by neural networks. Where visionary artists and intelligent algorithms collide to reshape culture." At the bottom, there are two prominent buttons: "START COLLABORATING" in a red box and "► WATCH SHOWREEL" in a white box. A small "SCROLL" link is located just above the bottom right corner.

A LIVING NETWORK OF MINDS

Visualize connections in real-time. Our neural engine maps creative synergy, suggesting collaborators who amplify your vision rather than dilute it.

12K+ ACTIVE CREATORS

850TB ASSETS GENERATED

The screenshot displays the ARTIVIST platform interface. At the top, there's a navigation bar with the ARTIVIST logo, followed by links for NETWORK, INTELLIGENCE, WORKSPACE, and INSIGHTS, a search icon, and buttons for LOG IN and JOIN BETA.

The main area features a "REAL-TIME COLLABORATION" section with a dark background. It highlights "Version control for art. Branch, merge, and fork creative projects with the same precision as code. Track every contribution." Below this, two features are listed: "Non-Destructive Editing" (with a pencil icon) and "Smart Contracts" (with a lock icon).

A large, semi-transparent box labeled "TIMELINE" contains three items:

- Initial Concept Sketch**: Uploaded base layers for character design. (2h ago)
- Color Grading**: Applied 'Cyberpunk Noir' LUT pack and adjusted curves. (45m ago)
- Merge Request: 3D Assets**: Integrating Blender exports into the main composition. (Now)
Buttons: Review, Diff

At the top right of the timeline box, there's a circular icon showing four user profiles with the number "+4".

PREDICTIVE INSIGHTS

Analyze trend velocity and audience reception before you publish.

TREND VELOCITY

94.2%

+12.5% vs last week

A line chart showing a steady upward trend in red, starting low and ending high, with a small green annotation at the bottom left indicating growth compared to the previous week.

AUDIENCE MATCH

Gen Z

Primary Demographic

A bar chart showing audience match distribution across different demographic groups. The 'Gen Z' bar is the tallest and colored red, while others are grey.

VIRAL POTENTIAL

High

Based on current metadata

A circular progress bar with a red arc indicating 'High' viral potential. A white circle in the center contains the text '88/100'.

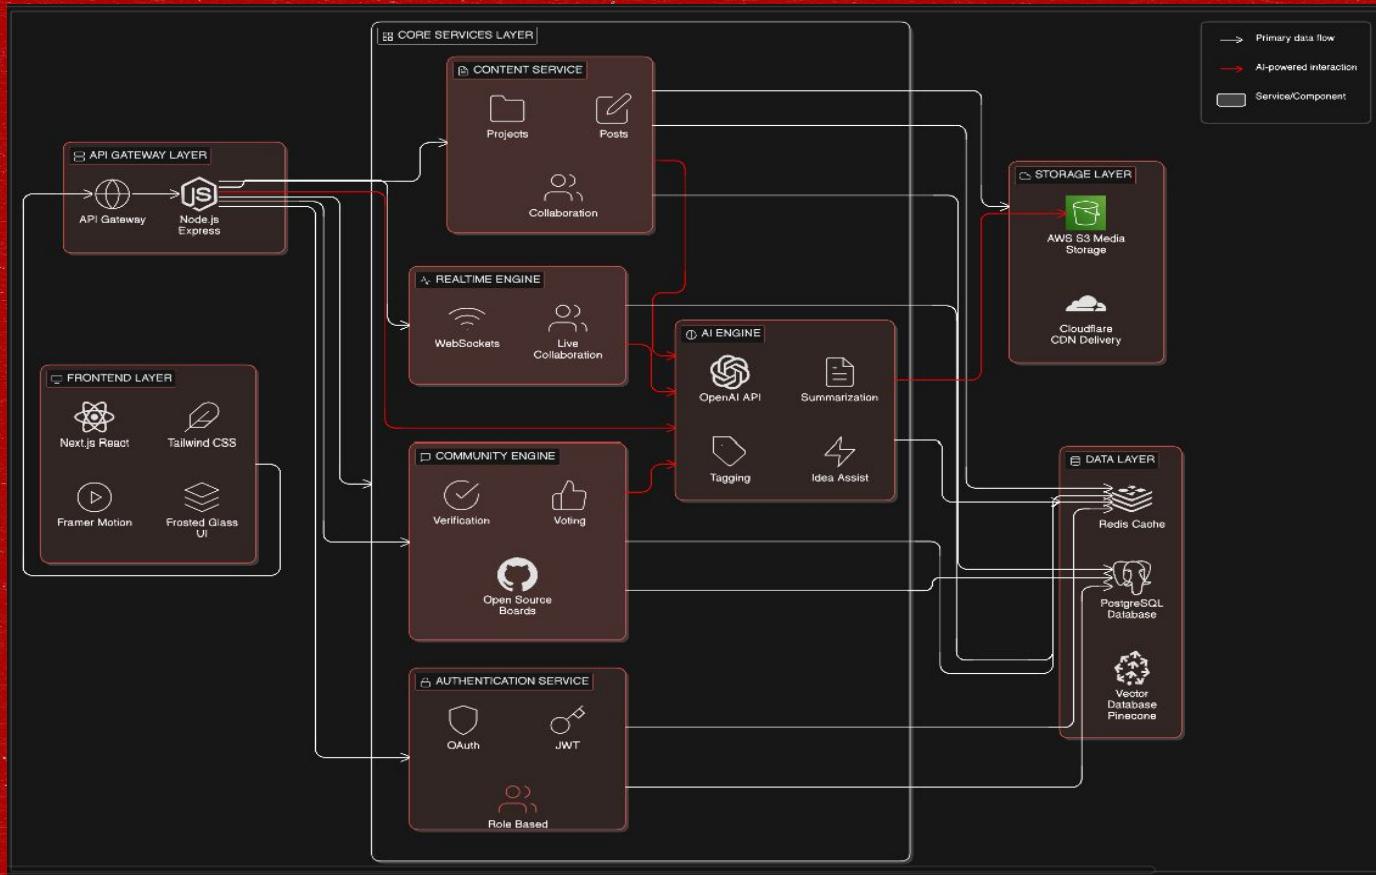

EST. REVENUE

4.2 ETH

Floor price projection

A bar chart showing estimated revenue in ETH. The total value is 4.2 ETH, with a red bar representing the final projected amount and several grey bars representing intermediate steps or components.

TECHNOLOGIES USED

Next.js, React,
Tailwind CSS,
Framer Motion, Node.js,
Amazon API Gateway
AWS Lambda
Amazon RDS, PostgreSQL,
Amazon S3,
Amazon Bedrock
